RG104 E-1 Box 160

Mint of the United States at Philadelphia,

Cashier's Office,

Nov. 11, 1889.

Hon. O. C. Bosbyshell
Superintendent

Sir: The lowering of grade in the gangways of the basement makes it necessary to cut down and lower the vaults on either hand to the new grade. They cannot be entered by trucks otherwise.

The vaults most likely to be required for working purposes at present are D and E — first two west of eastern staircase north side of gangway. When the order came to lower the grade it was said that the accommodation of the vaults affected to the new grade would not be refused to them applied for. The cost comes out of the appropriation for "vaults and locks" and does not affect the Mint funds.

In view of the necessities of the case I most respectfully suggest that the Superintendent examine into the matter,

2

and grading the case properly stated herein, that applic-
-ation be made to the Bureau at Washington for the prompt
lowering of vaults D and E to grade. It will probably
be necessary to consult with Mr. Bancroft, representing
Supervising Architect Windrim, as a preliminary to the application.

Very Respectfully

H.H. Bell
Lieut

NARA RG104, Entry 1, Box 160

Hon. O.C. Bosbyshell
Superintendent

Sir:

The lowering of grade in the gangways of the basement makes it necessary to cut down and lower the vaults on either hand to the new grade. They cannot be entered by trucks otherwise.

The vaults most likely to be required for working purposes at present are D and E – first two west of eastern staircase north side of gangway. When the order came to lower the grade it was said that the accommodation of the vaults affected to the new grade would not be refused when applied for. The cost comes out of the appropriation for "vaults and locks" and does not affect the Mint funds.

In view of the necessities of the case I most respectfully suggest that the Superintendent examine into the matter, and finding the case properly stated herein, that application be made to the Bureau at Washington for the prompt lowering of vaults D and E to grade. It will probably be necessary to consult with Mr. Hancock, representing Supervising Architect Windrim, as a preliminary to the application.

Very Respectfully,
M.H. Cobb
Cash.
